Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-10 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that examination of both inventions can be made without serious burden, and further, that the criteria for restriction has not been met. This is not found persuasive because the inventions are independent and distinct as shown by their separate classification, and the reasons given for restriction; and burden has been demonstrated, as the search for one group is not required for the other group.

The requirement is still deemed proper and is therefore made FINAL.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The words "and Resin Molding Machine" should be deleted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 9, 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Seng et al., USP 6,439,869.

The cited reference teaches the claimed method of resin molding, including covering an area of a die with release film, clamping a component between an upper die and lower die and evacuating air from the die area by drawing a vacuum and sealing the resin film adjacent the area and filling the cavity with molding resin. Note that the component may comprise an electronic device on a substrate. Note that air conduits are also provided. See figure 4(c) wherein the release film is removed from the mold and final product. See col. 4, lines 8-18, 25-27, 33-42, 60-67; col. 5, lines 1-15, 35-40, 49-65; col. 6, lines 1-5, 30-65; col. 7, lines 15-20; col. 8, lines 5-12.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 1732

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,261,501. Although the conflicting claims are not identical, they are not patentably distinct from each other because both methods set forth resin molding, including covering an area of a die with release film, clamping a component between an upper die and lower die and evacuating air to seal the release film against the die as well as the component and filling the cavity with molding resin.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USP's 5800841; 5824252; 5891384; 5891483; 6187243; 6344162; 6444157; 6478562.
